1. Decision brief

DRAFT - preliminary analysis

Review question	Case model summary
Objective	The client seeks advice on acquiring five English flats and prefers a Liechtenstein fund while demanding an undefined 10% annual return.
Recorded inputs	Five-flat acquisition and amortizing debt profile: Price is £1,000,000 with £800,000 debt, £200,000 deposit, 7.5% rate, 120-month amortization, £146,000 corrected annual gross rent (owner-provided [extract]) Annual rental income: Annual gross rental income: £146,000 per year. Source status: Owner-revised assumption. Expenses under the 25% rule: $25\% \times £146,000 = £36,500$ per [extract] + 1 more in the case.
Decision criteria	Set the scope of the engagement Define the 10% return metric Obtain residence, UBO, wealth and funds evidence Commission asset, rent, title and lender diligence Decide whether to reserve the property Obtain coordinated UK, PRC and Liechtenstein opinions Accept or reject the proposed funding route Compare ownership and financing routes Test the Liechtenstein AIF evidence package + 3 more in the case.
Possible outcomes	Proportionate, evidenced and financially reconciled route Timely stop or renegotiation protects the client Lawful but uneconomic or materially defective execution
Conclusion and basis	This PDF describes the case model. It does not establish a selected outcome or prove that a run was completed. Check each branch's full conditions in the case before recommending an outcome.
Assumptions	Initial deposit is £200,000. The acquisition-cost input is 7% of the £1,000,000 price and is provisional rather than a calculated SDLT amount. Further assumptions are in the economics appendix.
Sources and limits	1 public HTTPS source(s); 1 evidence record(s). Individual fact-verification status is not recorded in this Studio model. Source references within records also require checking.
Next actions	Verify inputs and assumptions against sources; run the relevant scenarios; document the chosen outcome and its conditions; obtain independent approval through the case workflow.

Selected records and labelled extracts are shown above. The complete graph appendix retains all visible node and connection text. Text supplied in the case keeps its original language.

2. Case overview

Field	Value
Case ID / version	five_flats_three_borders_rent146000_working_20260923 / v1.0.0
Jurisdiction	England and Wales; People's Republic of China; Liechtenstein
Professional role	Lead cross-border adviser coordinating UK, PRC and Liechtenstein specialists
Practice area	Tax planning
Difficulty	Intermediate
Legal / guidance as of	2026-10-31
Tags	cross-border, England residential property, PRC resident investor, Liechtenstein AIF, UK property SPV, residential letting, financing, AML and UBO, transaction structuring
Tax topics	SDLT purchaser and residence analysis, UK property income taxation, corporate finance-cost treatment, non-resident landlord obligations, ATED relief and return distinction, VAT-exempt residential rent, UK disposal and inheritance tax exposure, UK–China treaty and foreign tax credits, PRC worldwide income and gains, PRC outbound-funds compliance, tax transparency and treaty entitlement, PPT and anti-avoidance, ROE and beneficial ownership filings

3. Profile-specific analysis

Facts and evidence

Item	Professional record
Five-flat acquisition and amortizing debt profile	Price is £1,000,000 with £800,000 debt, £200,000 deposit, 7.5% rate, 120-month amortization, £146,000 corrected annual gross rent (owner-provided input; independent evidence pending), and a 1.25x lender DSCR threshold. The broker's separate £150,000 claim is unsupported. Owner-revised expenses under the 25% rule: $25\% \times £146,000 = £36,500$ per year. Rent after these expenses, before financing and other costs: $£146,000 - £36,500 = £109,500$ per year.
Client KYC profile	Client should provide a completed KYC questionnaire

Authorities

Item	Professional record
Three-country legal and tax gates require verification	Purchaser-specific UK tax and filings, PRC worldwide tax and lawful outbound funding, and Liechtenstein AIF eligibility, regulation, substance, transparency, treaty, and distribution treatment must be documented. Formation alone creates no treaty access.

Options

Item	Professional record
Set the scope of the engagement	Choose whether to test the requested fund against lawful alternatives or initially limit work to the requested structure, subject to professional independence.
Define the 10% return metric	Require a named metric and present gross yield, NOI yield, after-tax cash-on-cash return, and 10-year after-tax equity IRR separately.
Obtain residence, UBO, wealth and funds evidence	Decide whether the file supports lawful ownership and funding or whether advice must pause pending satisfactory evidence.
Commission asset, rent, title and lender diligence	Test title, five-dwelling status, licensing and landlord obligations, achievable rent, operating costs, amortization, security, and borrower conditions.
Decide whether to reserve the property	Choose whether to reserve conditionally, renegotiate timing or economics, or avoid commitment while material evidence remains outstanding.

Options

Item	Professional record
Obtain coordinated UK, PRC and Liechtenstein opinions	Commission current, source-supported advice addressing tax, filings, outbound funds, AIF availability, transparency, treaty access, substance, leverage, and distributions.
Accept or reject the proposed funding route	Proceed only with documented wealth and a lawful bank or SAFE-compliant route; unresolved or misdescribed funds require a pause or refusal.
Compare ownership and financing routes	Compare direct individual ownership, a UK property SPV, an available Liechtenstein AIF, and an AIF holding a UK SPV, together with stopping or renegotiating.
Test the Liechtenstein AIF evidence package	Require an FMA-authorised AIFM letter covering eligibility, approval, providers, leverage, legal form, substance, AML, UBO, CRS, tax transparency, treaty and PPT analysis, lender security, PRC distributions, timing, and complete fees.
Complete purchaser-specific tax and cash-flow modeling	Calculate SDLT only after purchaser, title, residence, and relief facts are known. Reconcile NOI, amortizing debt, DSCR, country taxes, distributions, full initial equity, returns, break-even points, exit, FX, and fund payback.
Recommend, renegotiate, condition or decline execution	Set conditions for KYC, lawful funds, lender approval, regulatory feasibility, tax filings, transaction documents, and a reconciled base, downside and evidenced-upside model.
Review year-one results and compliance	Compare actual rent, vacancy, repairs, DSCR, loan balance, taxes, ATED return position, distributions, fees, and FX against the approved model and covenant conditions.
Proportionate, evidenced and financially reconciled route	The chosen route is supported by lawful funds, purchaser-specific tax analysis, lender approval, full-cost return metrics, complete filings, and evidence appropriate to its complexity. This may be a simple route rather than a fund.
Timely stop or renegotiation protects the client	The adviser pauses, renegotiates, or declines because evidence, funding, financing, economics, timing, or legal feasibility is unresolved. The decision preserves compliance and avoids unsupported execution.
Lawful but uneconomic or materially defective execution	The route suffers a financing or DSCR mismatch, unsupported treaty position, purchaser-tax error, compliance failure, excessive fund costs, trapped distributions, or operational underperformance. Concealed ownership or unlawful funding is a failure condition.

Tax position

Item	Professional record
Three-country legal and tax gates require verification	Purchaser-specific UK tax and filings, PRC worldwide tax and lawful outbound funding, and Liechtenstein AIF eligibility, regulation, substance, transparency, treaty, and distribution treatment must be documented. Formation alone creates no treaty access.

Tax position

Item	Professional record
Set the scope of the engagement	Choose whether to test the requested fund against lawful alternatives or initially limit work to the requested structure, subject to professional independence.
Define the 10% return metric	Require a named metric and present gross yield, NOI yield, after-tax cash-on-cash return, and 10-year after-tax equity IRR separately.
Obtain residence, UBO, wealth and funds evidence	Decide whether the file supports lawful ownership and funding or whether advice must pause pending satisfactory evidence.
Commission asset, rent, title and lender diligence	Test title, five-dwelling status, licensing and landlord obligations, achievable rent, operating costs, amortization, security, and borrower conditions.
Decide whether to reserve the property	Choose whether to reserve conditionally, renegotiate timing or economics, or avoid commitment while material evidence remains outstanding.
Obtain coordinated UK, PRC and Liechtenstein opinions	Commission current, source-supported advice addressing tax, filings, outbound funds, AIF availability, transparency, treaty access, substance, leverage, and distributions.
Accept or reject the proposed funding route	Proceed only with documented wealth and a lawful bank or SAFE-compliant route; unresolved or misdescribed funds require a pause or refusal.
Compare ownership and financing routes	Compare direct individual ownership, a UK property SPV, an available Liechtenstein AIF, and an AIF holding a UK SPV, together with stopping or renegotiating.
Test the Liechtenstein AIF evidence package	Require an FMA-authorized AIFM letter covering eligibility, approval, providers, leverage, legal form, substance, AML, UBO, CRS, tax transparency, treaty and PPT analysis, lender security, PRC distributions, timing, and complete fees.
Complete purchaser-specific tax and cash-flow modeling	Calculate SDLT only after purchaser, title, residence, and relief facts are known. Reconcile NOI, amortizing debt, DSCR, country taxes, distributions, full initial equity, returns, break-even points, exit, FX, and fund payback.
Recommend, renegotiate, condition or decline execution	Set conditions for KYC, lawful funds, lender approval, regulatory feasibility, tax filings, transaction documents, and a reconciled base, downside and evidenced-upside model.
Review year-one results and compliance	Compare actual rent, vacancy, repairs, DSCR, loan balance, taxes, ATED return position, distributions, fees, and FX against the approved model and covenant conditions.
Proportionate, evidenced and financially reconciled route	The chosen route is supported by lawful funds, purchaser-specific tax analysis, lender approval, full-cost return metrics, complete filings, and evidence appropriate to its complexity. This may be a simple route rather than a fund.
Timely stop or renegotiation protects the client	The adviser pauses, renegotiates, or declines because evidence, funding, financing, economics, timing, or legal feasibility is unresolved. The decision preserves compliance and avoids unsupported execution.

Tax position

Item	Professional record
Lawful but uneconomic or materially defective execution	The route suffers a financing or DSCR mismatch, unsupported treaty position, purchaser-tax error, compliance failure, excessive fund costs, trapped distributions, or operational underperformance. Concealed ownership or unlawful funding is a failure condition.

4. Economics and scenario analysis

Investment and cash-flow analysis

Input	Value
Purchase price	£1,000,000
LTV	80.0%
Interest rate	7.5%
Term	120 months
Gross annual income	£146,000
Known operating costs	£36,500
One-off structure cost	£15,000
Annual structure cost	£10,000
Target cash-on-cash return	10.0%

Repayment basis	Debt service	Annual cash flow	CoC	DSCR
Amortizing	£113,954	-£14,454	-5.1%	0.87x

These are deterministic calculations from supplied assumptions, not probabilities or a forecast. Currency effects, exit costs, tax and unpriced costs are excluded. Use the Decision report for explicit income sensitivities.

- Initial deposit is £200,000.
- The acquisition-cost input is 7% of the £1,000,000 price and is provisional rather than a calculated SDLT amount.
- Owner-revised annual gross rent: £146,000. Expenses: $25\% \times £146,000 = £36,500/\text{year}$. Rent after these expenses: £109,500/year before financing and other costs. After £10,000 structure cost and £113,953.70 amortizing debt service, cash flow is -£14,453.70/year before tax and unknown costs. Independent evidence and outcome approval are pending.
- Known initial cash is at least £285,000 before currently unpriced professional, lender, valuation, registration, and reserve costs.
- Scheduled amortizing debt service uses the supplied control of £9,496.14 monthly and £113,953.70 annually, subject to confirmation.
- The lender's minimum DSCR is 1.25x, calculated as NOI divided by scheduled debt service.
- Interest-only debt service of £60,000 annually plus an £800,000 balloon remains a comparison control, not the selected repayment basis.

The following figures are an arithmetic scenario only. Rate sources, taxable base, deductibility and eligibility are not established by this model. Do not treat the amounts as verified savings or offset them against a financing shortfall.

Unverified tax scenario — not a tax recommendation

Metric	Result
Annual taxable base	£49,500
Baseline / optimized tax rates	35.0% / 5.0%
Derived baseline / optimized tax	£17,325 / £2,475
Gross annual tax saving	£14,850
Recognized annual saving	£12,623
Annualized implementation	£5,000
Annualized net benefit	-£2,378
Simple payback	68.6 months
Lifecycle ROI	-45.9%
NPV	-£27,843

Assumptions: Tax base is prefilled as gross annual rent less rental-property expenses less annual loan-interest expense. Verify every case input and tax rate before relying on the estimate.

Tax-rate sources: baseline=unset; optimized=unset.

Graph page 2

N07 | TAX RULE | Three-country legal and tax gates require verification

Purchaser-specific UK tax and filings, PRC worldwide tax and lawful outbound funding, and Liechtenstein AIF eligibility, regulation, substance, transparency, treaty, and distribution treatment must be documented. Formation alone creates no treaty access.

Graph page 2

N08 | DECISION | Set the scope of the engagement

Choose whether to test the requested fund against lawful alternatives or initially limit work to the requested structure, subject to professional independence.

Graph page 2

N09 | DECISION | Define the 10% return metric

Require a named metric and present gross yield, NOI yield, after-tax cash-on-cash return, and 10-year after-tax equity IRR separately.

Graph page 2

N10 | DECISION | Obtain residence, UBO, wealth and funds evidence

Decide whether the file supports lawful ownership and funding or whether advice must pause pending satisfactory evidence.

Graph page 3

N11 | DECISION | Commission asset, rent, title and lender diligence

Test title, five-dwelling status, licensing and landlord obligations, achievable rent, operating costs, amortization, security, and borrower conditions.

Graph page 3

N12 | DECISION | Decide whether to reserve the property

Choose whether to reserve conditionally, renegotiate timing or economics, or avoid commitment while material evidence remains outstanding.

Graph page 3

N13 | DECISION | Obtain coordinated UK, PRC and Liechtenstein opinions

Commission current, source-supported advice addressing tax, filings, outbound funds, AIF availability, transparency, treaty access, substance, leverage, and distributions.

Graph page 3

N14 | DECISION | Accept or reject the proposed funding route

Proceed only with documented wealth and a lawful bank or SAFE-compliant route; unresolved or misdescribed funds require a pause or refusal.

Graph page 4

N15 | DECISION | Compare ownership and financing routes

Compare direct individual ownership, a UK property SPV, an available Liechtenstein AIF, and an AIF holding a UK SPV, together with stopping or renegotiating.

Graph page 4

N16 | DECISION | Test the Liechtenstein AIF evidence package

Require an FMA-authorised AIFM letter covering eligibility, approval, providers, leverage, legal form, substance, AML, UBO, CRS, tax transparency, treaty and PPT analysis, lender security, PRC distributions, timing, and complete fees.

Graph page 4

N17 | DECISION | Complete purchaser-specific tax and cash-flow modeling

Calculate SDLT only after purchaser, title, residence, and relief facts are known. Reconcile NOI, amortizing debt, DSCR, country taxes, distributions, full initial equity, returns, break-even points, exit, FX, and fund payback.

Graph page 5

N18 | CASH FLOW | Annual rental income

Annual gross rental income: £146,000 per year. Source status: Owner-revised assumption. Expenses under the 25% rule: $25\% \times £146,000 = £36,500$ per year. Rent after these expenses, before financing and other costs: $£146,000 - £36,500 = £109,500$ per year. The retained £10,000 annual structure cost reduces model NOI to £99,500. Selected amortizing debt service of £113,953.70 leaves negative annual cash flow of -£14,453.70 before tax and unknown costs. Independent rent/budget evidence and outcome approval remain pending.

Graph page 5

N19 | DECISION | Recommend, renegotiate, condition or decline execution

Set conditions for KYC, lawful funds, lender approval, regulatory feasibility, tax filings, transaction documents, and a reconciled base, downside and evidenced-upside model.

Graph page 5

N20 | DECISION | Review year-one results and compliance

Compare actual rent, vacancy, repairs, DSCR, loan balance, taxes, ATED return position, distributions, fees, and FX against the approved model and covenant conditions.

Graph page 5

N21 | OUTCOME | Proportionate, evidenced and financially reconciled route

The chosen route is supported by lawful funds, purchaser-specific tax analysis, lender approval, full-cost return metrics, complete filings, and evidence appropriate to its complexity. This may be a simple route rather than a fund.

Graph page 5

N22 | OUTCOME | Timely stop or renegotiation protects the client

The adviser pauses, renegotiates, or declines because evidence, funding, financing, economics, timing, or legal feasibility is unresolved. The decision preserves compliance and avoids unsupported execution.

Graph page 5

N23 | OUTCOME | Lawful but uneconomic or materially defective execution

The route suffers a financing or DSCR mismatch, unsupported treaty position, purchaser-tax error, compliance failure, excessive fund costs, trapped distributions, or operational underperformance. Concealed ownership or unlawful funding is a failure condition.

A008 · N13 -> N14

N13 -> N14 | label=Commission coordinated specialist opinions | detail=Obtain UK tax work for £7,500, PRC and SAFE work for £6,000, and the AIFM letter for £4,500. | result=The file receives jurisdiction-specific analysis and identified confirmation requirements. | cost=18000 | effect.evidence=5 | effect.exposure=-3 | effect.position=3 | effect.trust=1 | repeatability=once

A009 · N13 -> N22

N13 -> N22 | label=Pause when specialist coverage is unavailable | detail=Do not substitute promoter assertions or assumptions for necessary jurisdictional analysis. | result=The structure is not advanced without adequate professional coverage. | cost=0 | effect.evidence=0 | effect.exposure=-2 | effect.position=2 | effect.trust=0 | repeatability=once

A010 · N14 -> N15

N14 -> N15 | label=Confirm a lawful funding route | detail=Document ownership, wealth, source and movement of equity through lawful banking and applicable outbound procedures. | result=The ownership routes can be compared on a compliant funding premise. | cost=0 | effect.evidence=4 | effect.exposure=-3 | effect.position=3 | effect.trust=2 | repeatability=once

A011 · N14 -> N22

N14 -> N22 | label=Reject unsupported funding alternatives | detail=Refuse quota pooling, false purpose, hidden nominees, underground banking or other unsupported routes. | result=The matter stops or waits for a lawful alternative. | cost=0 | effect.evidence=1 | effect.exposure=-4 | effect.position=3 | effect.trust=0 | repeatability=once

A012 · N02 -> N04

N02 -> N04 | label=Record the proposed transaction | detail=Capture the five-flat asset, price, deposit, debt and rental facts as scenario inputs. | result=The asset and financing file is available for testing. | cost=0 | effect.evidence=0 | effect.exposure=0 | effect.position=0 | effect.trust=0 | repeatability=once

A013 · N15 -> N16

N15 -> N16 | label=Continue testing an AIF-based route | detail=Test both a Liechtenstein AIF and an AIF holding a UK SPV without assuming availability or treaty access. | result=The fund route proceeds to regulatory and economic proof. | cost=0 | effect.evidence=1 | effect.exposure=1 | effect.position=1 | effect.trust=0 | repeatability=once

A014 · N15 -> N17

N15 -> N17 | label=Model direct and UK SPV routes | detail=Advance the simpler lawful baselines for purchaser-specific tax, financing and return comparison. | result=The baseline routes proceed without unnecessary fund assumptions. | cost=0 | effect.evidence=1 | effect.exposure=-1 | effect.position=2 | effect.trust=1 | repeatability=once

A015 · N15 -> N22

N15 -> N22 | label=Stop or renegotiate before structuring | detail=Use this option where no route presently meets the legal, evidential, financing or economic constraints. | result=A proportionate stop remains available as a positive advisory result. | cost=0 | effect.evidence=0 | effect.exposure=-2 | effect.position=2 | effect.trust=0 | repeatability=once

A016 · N16 -> N17

N16 -> N17 | label=Accept a complete AIFM evidence package | detail=Carry the evidenced regulatory form, providers, leverage, substance, transparency, treaty, lender, distribution and fee facts into the model. | result=The fund can be compared without presuming legal or economic superiority. | cost=0 | effect.evidence=4 | effect.exposure=-2 | effect.position=2 | effect.trust=1 | repeatability=once

A017 · N16 -> N23

N16 -> N23 | label=Proceed despite missing fund proof | detail=Advance the vehicle without complete eligibility, provider, substance, treaty, financing or fee evidence. | result=The route is exposed to treaty-shopping failure, financing defects, hidden costs or regulatory infeasibility. | cost=0 | effect.evidence=-2 | effect.exposure=4 | effect.position=3 | effect.trust=-2 | repeatability=once

A018 · N16 -> N22

N16 -> N22 | label=Reject an unsupported or uneconomic fund | detail=Use the missing evidence or unfavorable cost-benefit result to stop the fund route while preserving simpler alternatives for a later mandate. | result=Unsupported complexity is not implemented. | cost=0 | effect.evidence=2 | effect.exposure=-3 | effect.position=3 | effect.trust=1 | repeatability=once

A019 · N17 -> N19

N17 -> N19 | label=Build the full-cost comparison model | detail=Spend £2,500 to reconcile gross rent, 25% operating-cost assumption, NOI, amortizing debt, DSCR, taxes, distributions, full initial cash, four return metrics, fund benefit, payback, exit and FX. | result=Execution choices rest on a model that identifies assumptions and does not use only the deposit as equity. | cost=2500 | effect.evidence=3 | effect.exposure=-3 | effect.position=3 | effect.trust=2 | repeatability=once

A020 · N17 -> N22

N17 -> N22 | label=Pause for irreconcilable tax or model inputs | detail=Do not calculate purchaser tax or claim the target is met while purchaser identity, title treatment, residence, costs or return metric remains unresolved. | result=The recommendation is withheld until the model can be reconciled. | cost=0 | effect.evidence=1 | effect.exposure=-2 | effect.position=2 | effect.trust=1 | repeatability=once

A021 · N19 -> N20

N19 -> N20 | label=Execute subject to closing conditions | detail=Proceed with the selected route only after KYC, funds, lender, tax, regulatory, filing and document conditions are satisfied; count the £15,000 setup fee once. | result=The completed transaction moves to monitored year-one performance. | cost=15000 | effect.evidence=2 | effect.exposure=0 | effect.position=2 | effect.trust=1 | repeatability=once

A022 · N19 -> N22

N19 -> N22 | label=Decline or renegotiate execution | detail=Stop, change debt, seek a lower price, extend timing or select a simpler route where DSCR, costs, evidence or compliance conditions fail. | result=The adviser avoids forcing completion on defective terms. | cost=0 | effect.evidence=1 | effect.exposure=-3 | effect.position=3 | effect.trust=1 | repeatability=once

A023 · N04 -> N05

N04 -> N05 | label=Map the transaction calendar | detail=Place the supplied advice, lender, reservation, exchange, completion and review milestones on the file. | result=Time pressure is visible without inventing clock times. | cost=0 | effect.evidence=0 | effect.exposure=0 | effect.position=0 | effect.trust=0 | repeatability=once

A024 · N19 -> N23

N19 -> N23 | label=Complete with unresolved conditions | detail=Proceed despite an unproven tax position, financing mismatch, incomplete filings, unsupported treaty access or omitted costs. | result=Execution creates material compliance, financing or economic exposure. | cost=0 | effect.evidence=-2 | effect.exposure=5 | effect.position=-4 | effect.trust=-3 | repeatability=once

A025 · N20 -> N21

N20 -> N21 | label=Reconcile and remediate year-one performance | detail=Complete required filings, compare actual results with the model, preserve covenant compliance, and address variances transparently. Include the £10,000 annual structure cost where applicable. | result=The route remains proportionate, evidenced and monitored. | cost=10000 | effect.evidence=4 | effect.exposure=-3 | effect.position=4 | effect.trust=3 | repeatability=once

A026 · N20 -> N23

N20 -> N23 | label=Ignore material year-one variances | detail=Fail to address vacancy, repairs, covenant pressure, filing obligations, distribution restrictions, fees or divergence from the approved return model. | result=Operational underperformance or compliance defects impair the transaction. | cost=0 | effect.evidence=-2 | effect.exposure=4 | effect.position=-3 | effect.trust=-3 | repeatability=once

A027 · N20 -> N22

N20 -> N22 | label=Renegotiate, refinance or plan an orderly exit | detail=Respond to a sustained mismatch by changing debt or operations, or by planning a compliant exit rather than preserving an unsuitable structure. | result=A controlled corrective decision limits further exposure. | cost=0 | effect.evidence=2 | effect.exposure=-2 | effect.position=2 | effect.trust=1 | repeatability=once

A028 · N17 -> N18

N17 -> N18

A029 · N04 -> N06

N04 -> N06

A030 · N02 -> N03

N02 -> N03

A031 · N05 -> N07

N05 -> N07 | label=Identify cross-border gates | detail=Separate the UK, PRC and Liechtenstein questions that require specialist evidence. | result=Formation and completion are made conditional on legal and evidential feasibility. | cost=0 | effect.evidence=1 | effect.exposure=-1 | effect.position=1 | effect.trust=0 | repeatability=once

A032 · N07 -> N08

N07 -> N08 | label=Present the engagement choices | detail=Explain the difference between implementing the preferred vehicle and conducting an independent comparative review. | result=The player must define a defensible mandate. | cost=0 | effect.evidence=0 | effect.exposure=0 | effect.position=1 | effect.trust=0 | repeatability=once

A033 · N08 -> N09

N08 -> N09 | label=Authorize a comparative review | detail=Test the requested fund against direct ownership, a UK SPV, an AIF holding a UK SPV, and stopping or renegotiating. | result=The return target must be defined before structures are ranked. | cost=0 | effect.evidence=1 | effect.exposure=-1 | effect.position=2 | effect.trust=1 | repeatability=once

A034 · N08 -> N10

N08 -> N10 | label=Start with a narrow fund mandate | detail=Preserve professional independence and make any implementation subject to identity, funds and feasibility evidence. | result=The review advances, but the economic metric remains unresolved for later modeling. | cost=0 | effect.evidence=0 | effect.exposure=1 | effect.position=0 | effect.trust=0 | repeatability=once

A035 · N09 -> N10

N09 -> N10 | label=Name and document the return metric | detail=Select a metric while retaining all four required measures in the final comparison. | result=The 10% target can be tested without conflating yield, cash flow and IRR. | cost=0 | effect.evidence=1 | effect.exposure=-1 | effect.position=2 | effect.trust=1 | repeatability=once

A036 · N09 -> N22

N09 -> N22 | label=Pause over an undefined target | detail=Decline to state that the target is met until the client identifies the intended measure. | result=The engagement pauses without issuing a misleading return conclusion. | cost=0 | effect.evidence=0 | effect.exposure=-2 | effect.position=1 | effect.trust=0 | repeatability=once
