1. Decision brief

DRAFT - preliminary analysis

Review question	Case model summary
Objective	Should Verdant Atelier accept a managed-site expansion opportunity now, approve a conditional 90-day transition pilot, renegotiate/defer, or decline? This demonstration uses entirely fictional organisations, documents, people and figures. It is inspired only by publicly described industry patterns [extract]
Recorded inputs	Is independent commissioning evidence accepted?: D06 v1 § Commissioning: Independent closure evidence for batch-to-delivery traceability reconciliation is pending. This material readiness gap blocks [extract]
Decision criteria	Is this within the committee mandate? Do mandatory safety and traceability clearances permit proceeding? Is sufficient demand signed, not merely indicated? Is the site suitable for high-value crops? Does cold-chain capacity satisfy the service model? Does downside payback meet the mandate? Can remaining risks be bounded by pilot and exit conditions?
Possible outcomes	Approve managed-site operation Conditional 90-day transition pilot Renegotiate and defer Decline / no-go
Conclusion and basis	This PDF describes the case model. It does not establish a selected outcome or prove that a run was completed. Check each branch's full conditions in the case before recommending an outcome.
Assumptions	Assumptions are not recorded separately. Review conditions and uncertainties in the detailed records.
Sources and limits	0 public HTTPS source(s); 1 evidence record(s). Individual fact-verification status is not recorded in this Studio model. Source references within records also require checking.
Next actions	Verify inputs and assumptions against sources; run the relevant scenarios; document the chosen outcome and its conditions; obtain independent approval through the case workflow.

Selected records and labelled extracts are shown above. The complete graph appendix retains all visible node and connection text. Text supplied in the case keeps its original language.

3. Profile-specific analysis

Issues

Item	Professional record
Is this within the committee mandate?	D01 v1 § Mandate: The fictional Investment and Operating Committee has ten days from dossier opening to choose a controlled managed-site opportunity. This mandate covers premium crops and a 90-day transition pilot, not commodity-volume expansion.
Do mandatory safety and traceability clearances permit proceeding?	D01 v1 § Safety: A failed or unavailable mandatory independent food-safety or traceability clearance at the production release gate means no-go regardless of financial attractiveness. No production release is permitted under the conditional pilot until all release conditions are independently accepted. Clearance state: no_critical_failure_identified. D06 v1 § Clearance: Base declaration: no critical safety failure is identified. Hard-stop stress declaration: mandatory independent food-safety or traceability clearance fails or is unavailable at the production release gate. That declaration requires no-go even with upside economics.
Is sufficient demand signed, not merely indicated?	D03 v1 § Demand: Total indicated demand is 600 packs per week: 300 signed, 180 non-binding LOI and 120 expressions of interest. Only 300 count as signed commitments against the 450 minimum.
Is the site suitable for high-value crops?	D04 v1 § Capacity: Evidenced premium-crop transition capacity is 480 packs per week. The candidate is suitable for the specified high-value crop mix. Commodity-volume expansion is excluded.
Does cold-chain capacity satisfy the service model?	D09 v1 § Service: The fictional service model supports same-day hospitality deliveries for up to 480 packs per week. Cold-chain capacity matches the scoped upside volume. Delivery owner Sol Hart retains a contingency carrier and may pause deliveries.
Does downside payback meet the mandate?	D07 v2 § Underwriting: Conservative Base: $690000 - 90000 - 520000 = 80000$ annual contribution. Conservative Upside: $780000 - 100000 - 600000 = 80000$. Both: $240000 / 80000 = 3.00$ years. Downside stress: $240000 / 70000 = 3.43$ years (rounded), above the inclusive 3-year maximum. This is transparent fixture arithmetic, not a new financial engine. D07 v2 § Base: Source baseline: 300 signed packs/week (D03 v1). Scenario assumptions: demand 300, yield 92%; annual revenue 720000, energy 80000, other costs 520000; contribution 120000; setup 240000; simple payback 2.00 years. Conservative payback 3.00 years. Unresolved source conditions prohibit production.
Can remaining risks be bounded by pilot and exit conditions?	D02 v1 § Exit: The pilot lasts 90 days with reviews on days 30, 60 and 90. Exit without expansion is required if signed demand, yield, independent release clearance or staffing conditions fail. Commercial owner: Mara Vale; decision deadline: day 10.

Facts and evidence

Item	Professional record
Is independent commissioning evidence accepted?	D06 v1 § Commissioning: Independent closure evidence for batch-to-delivery traceability reconciliation is pending. This material readiness gap blocks full operation but is not a failed critical safety control. Controlled non-production pilot work may resolve it.

Authorities

No structured items are recorded for this section; reviewer completion is required where material.

5. Facts, evidence and rules register

Category	Item	Detail / verification note
Evidence	Is independent commissioning evidence accepted?	D06 v1 § Commissioning: Independent closure evidence for batch-to-delivery traceability reconciliation is pending. This material readiness gap blocks full operation but is not a failed critical safety control. Controlled non-production pilot work may resolve it.

Each material item should be marked by the reviewer as verified, source-backed, judgment, confirmation required or uncertain before external circulation.

6. Authorities and source register

No public legal sources are recorded. Add verified HTTPS authorities and a legal as-of date before professional reliance.

7. Authoring and review trail

No authoring history is recorded.

8. Verification and sign-off

- ☐ Facts and evidence reconciled to the underlying file.
- ☐ Legal authorities remain current as of the stated date.
- ☐ Assumptions, exclusions and uncertainties are explicitly disclosed.
- ☐ Economics and scenario assumptions are independently checked.
- ☐ Confidentiality, privilege, conflicts and circulation scope are confirmed.

N03 | DECISION

Do mandatory safety and traceability clearances permit proceeding?

D01 v1 § Safety: A failed or unavailable mandatory independent food-safety or traceability clearance at the production release gate means no-go regardless of financial attractiveness. No production release is permitted under the conditional pilot until all release conditions are independently accepted. Clearance state: no_critical_failure_identified. D06 v1 § Clearance: Base declaration: no critical safety failure is identified. Hard-stop stress declaration: mandatory independent food-safety or traceability clearance fails or is unavailable at the production release gate. That declaration requires no-go even with upside economics.

N04 | DECISION

Is sufficient demand signed, not merely indicated?

D03 v1 § Demand: Total indicated demand is 600 packs per week: 300 signed, 180 non-binding LOI and 120 expressions of interest. Only 300 count as signed commitments against the 450 minimum.

N05 | OUTCOME

Decline / no-go

Mandatory failed or unavailable clearance prohibits production. See the exact current clearance record.

N06 | DECISION

Is the site suitable for high-value crops?

D04 v1 § Capacity: Evidenced premium-crop transition capacity is 480 packs per week. The candidate is suitable for the specified high-value crop mix. Commodity-volume expansion is excluded.

N07 | EVIDENCE

Is independent commissioning evidence accepted?

D06 v1 § Commissioning: Independent closure evidence for batch-to-delivery traceability reconciliation is pending. This material readiness gap blocks full operation but is not a failed critical safety control. Controlled non-production pilot work may resolve it.

N08 | ACTOR

Can the accountable leader and minimum team be in place?

D08 v1 § Leadership: Base: transition leader appointment and minimum-team commitment are unresolved. Upside declared assumption: transition lead Inez Reed and the minimum team are confirmed before release. Operating owner Noah Wren must evidence confirmation by day 10.

N09 | DECISION

Does cold-chain capacity satisfy the service model?

D09 v1 § Service: The fictional service model supports same-day hospitality deliveries for up to 480 packs per week. Cold-chain capacity matches the scoped upside volume. Delivery owner Sol Hart retains a contingency carrier and may pause deliveries.

Explicit professional review is required; D03 v2 stays unchanged. | result=Downside mandate fails | cost=0 | minutes=1 | effect.evidence=0 | effect.exposure=0 | effect.position=0 | effect.trust=0 | guard.01=exposure:eq:100 | repeatability=once

[A008 · N10 -> N12](#)

N10 -> N12 | label=Mandate met; consider evidence and exit conditions | detail=D01 v1 § Thresholds: Minimum signed demand: 450 packs per week. Required yield: 90%. Maximum downside simple payback: 3 years. Setup commitment: 240000 illustrative credits. These are committee assumptions, not market forecasts. | result=Mandate met; consider evidence and exit conditions | cost=0 | minutes=1 | effect.evidence=0 | effect.exposure=0 | effect.position=0 | effect.trust=0 | guard.01=exposure:eq:0 | repeatability=once

[A009 · N08 -> N09](#)

N08 -> N09 | label=Record accountable leadership condition | detail=D08 v1 § Leadership: Base: transition leader appointment and minimum-team commitment are unresolved. Upside declared assumption: transition lead Inez Reed and the minimum team are confirmed before release. Operating owner Noah Wren must evidence confirmation by day 10. | result=Record accountable leadership condition | cost=0 | minutes=1 | effect.evidence=0 | effect.exposure=0 | effect.position=0 | effect.trust=0 | repeatability=once

A010 · N02 -> N03

N02 -> N03 | label=Mandate confirmed | detail=D01 v1 § Mandate: The fictional Investment and Operating Committee has ten days from dossier opening to choose a controlled managed-site opportunity. This mandate covers premium crops and a 90-day transition pilot, not commodity-volume expansion. | result=Mandate confirmed | cost=0 | minutes=1 | effect.evidence=0 | effect.exposure=0 | effect.position=0 | effect.trust=0 | repeatability=once

A011 · N01 -> N02

N01 -> N02 | label=Apply explicitly reviewed scenario declaration | detail=Source baseline: 300 signed packs/week; commissioning and staffing remain unresolved. Yield 92% and economics are scenario assumptions. D01 v1 § Thresholds; D03 v1 § Demand; D06 v1 § Clearance; D06 v1 § Commissioning; D08 v1 § Leadership; D07 v2 § Base; D04 v1 § Capacity; D09 v1 § Service; D01 v1 § Safety | result=Apply explicitly reviewed scenario declaration | cost=0 | minutes=1 | effect.evidence=-100 | effect.exposure=-100 | effect.trust=100 | repeatability=once

A012 · N12 -> N13

N12 -> N13 | label=Accepted evidence permits scoped operation | detail=Requires accepted signed scope and commissioning closure. D03 v1 § Demand: Total indicated demand is 600 packs per week: 300 signed, 180 non-binding LOI and 120 expressions of interest. Only 300 count as signed commitments against the 450 minimum. D06 v1 § Commissioning: Independent closure evidence for batch-to-delivery traceability reconciliation is pending. This material readiness gap blocks full operation but is not a failed critical safety control. Controlled non-production pilot work may resolve it. | result=Accepted evidence permits scoped operation | cost=0 | minutes=1 | effect.evidence=0 | effect.exposure=0 | effect.position=0 | effect.trust=0 | guard.01=evidence:eq:100 | guard.02=trust:eq:100 | repeatability=once

A013 · N12 -> N14

N12 -> N14 | label=Pilot only; prohibit production release | detail=D01 v1 § Safety: A failed or unavailable mandatory independent food-safety or traceability clearance at the production release gate means no-go regardless of financial attractiveness. No production release is permitted under the conditional pilot until all release conditions are independently accepted. D02 v1 § Exit: The pilot lasts 90 days with reviews on days 30, 60 and 90. Exit without expansion is required if signed demand, yield, independent release clearance or staffing conditions fail. Commercial owner: Mara Vale; decision deadline: day 10. | result=Pilot only; prohibit production release | cost=0 | minutes=1 | effect.evidence=0 | effect.exposure=0 | effect.position=0 | effect.trust=0 | guard.01=evidence:eq:0 | guard.02=trust:eq:100 | repeatability=once
