1. Decision brief

DRAFT - preliminary analysis

Review question	Case model summary
Objective	The client seeks advice on acquiring five English flats and prefers a Liechtenstein fund while demanding an undefined 10% annual return.
Recorded inputs	Five-flat acquisition and amortizing debt profile: Price is £1,000,000 with £800,000 debt, £200,000 deposit, 7.5% rate, 120-month amortization, £146,000 corrected annual gross rent (owner-provided [extract]) Annual rental income: Annual gross rental income: £146,000 per year. Source status: Owner-revised assumption. Expenses under the 25% rule: $25\% \times £146,000 = £36,500$ per [extract] + 1 more in the case.
Decision criteria	Set the scope of the engagement Define the 10% return metric Obtain residence, UBO, wealth and funds evidence Commission asset, rent, title and lender diligence Decide whether to reserve the property Obtain coordinated UK, PRC and Liechtenstein opinions Accept or reject the proposed funding route Compare ownership and financing routes Test the Liechtenstein AIF evidence package + 3 more in the case.
Possible outcomes	Proportionate, evidenced and financially reconciled route Timely stop or renegotiation protects the client Lawful but uneconomic or materially defective execution
Conclusion and basis	This PDF describes the case model. It does not establish a selected outcome or prove that a run was completed. Check each branch's full conditions in the case before recommending an outcome.
Assumptions	Initial deposit is £200,000. The acquisition-cost input is 7% of the £1,000,000 price and is provisional rather than a calculated SDLT amount. Further assumptions are in the economics appendix.
Sources and limits	1 public HTTPS source(s); 1 evidence record(s). Individual fact-verification status is not recorded in this Studio model. Source references within records also require checking.
Next actions	Verify inputs and assumptions against sources; run the relevant scenarios; document the chosen outcome and its conditions; obtain independent approval through the case workflow.

Selected records and labelled extracts are shown above. The complete graph text appendix is omitted. Review the case for full node and connection conditions. Text supplied in the case keeps its original language.

2. Case overview

Field	Value
Case ID / version	five_flats_three_borders_rent146000_working_20260923 / v1.0.0
Jurisdiction	England and Wales; People's Republic of China; Liechtenstein
Professional role	Lead cross-border adviser coordinating UK, PRC and Liechtenstein specialists
Practice area	Tax planning
Difficulty	Intermediate
Case-entered legal reference date	2026-10-31
Tags	cross-border, England residential property, PRC resident investor, Liechtenstein AIF, UK property SPV, residential letting, financing, AML and UBO, transaction structuring
Tax topics	SDLT purchaser and residence analysis, UK property income taxation, corporate finance-cost treatment, non-resident landlord obligations, ATED relief and return distinction, VAT-exempt residential rent, UK disposal and inheritance tax exposure, UK–China treaty and foreign tax credits, PRC worldwide income and gains, PRC outbound-funds compliance, tax transparency and treaty entitlement, PPT and anti-avoidance, ROE and beneficial ownership filings
Case package	tax_planning@1.0.0
Report profile / renderer	tax_position_memorandum@1.0.0
Graph layout contract	1 · 1.1.0 · 2.1.0
Report state	DRAFT · INTERNAL

The case-entered reference date is not a verified legal currency check. Future-dated entries require correction; verify applicable authorities before reliance.

3. Profile-specific analysis

Facts and evidence

Item	Professional record
Five-flat acquisition and amortizing debt profile	Price is £1,000,000 with £800,000 debt, £200,000 deposit, 7.5% rate, 120-month amortization, £146,000 corrected annual gross rent (owner-provided input; independent evidence pending), and a 1.25x lender DSCR threshold. The broker's separate £150,000 claim is unsupported. Owner-revised expenses under the 25% rule: $25\% \times £146,000 = £36,500$ per year. Rent after these expenses, before financing and other costs: $£146,000 - £36,500 = £109,500$ per year.
Client KYC profile	Client should provide a completed KYC questionnaire

Authorities

Item	Professional record
Three-country legal and tax gates require verification	Purchaser-specific UK tax and filings, PRC worldwide tax and lawful outbound funding, and Liechtenstein AIF eligibility, regulation, substance, transparency, treaty, and distribution treatment must be documented. Formation alone creates no treaty access.

Options

Item	Professional record
Set the scope of the engagement	Choose whether to test the requested fund against lawful alternatives or initially limit work to the requested structure, subject to professional independence.
Define the 10% return metric	Require a named metric and present gross yield, NOI yield, after-tax cash-on-cash return, and 10-year after-tax equity IRR separately.
Obtain residence, UBO, wealth and funds evidence	Decide whether the file supports lawful ownership and funding or whether advice must pause pending satisfactory evidence.

Options

Item	Professional record
Commission asset, rent, title and lender diligence	Test title, five-dwelling status, licensing and landlord obligations, achievable rent, operating costs, amortization, security, and borrower conditions.
Decide whether to reserve the property	Choose whether to reserve conditionally, renegotiate timing or economics, or avoid commitment while material evidence remains outstanding.
Obtain coordinated UK, PRC and Liechtenstein opinions	Commission current, source-supported advice addressing tax, filings, outbound funds, AIF availability, transparency, treaty access, substance, leverage, and distributions.
Accept or reject the proposed funding route	Proceed only with documented wealth and a lawful bank or SAFE-compliant route; unresolved or misdescribed funds require a pause or refusal.
Compare ownership and financing routes	Compare direct individual ownership, a UK property SPV, an available Liechtenstein AIF, and an AIF holding a UK SPV, together with stopping or renegotiating.
Test the Liechtenstein AIF evidence package	Require an FMA-authorised AIFM letter covering eligibility, approval, providers, leverage, legal form, substance, AML, UBO, CRS, tax transparency, treaty and PPT analysis, lender security, PRC distributions, timing, and complete fees.
Complete purchaser-specific tax and cash-flow modeling	Calculate SDLT only after purchaser, title, residence, and relief facts are known. Reconcile NOI, amortizing debt, DSCR, country taxes, distributions, full initial equity, returns, break-even points, exit, FX, and fund payback.
Recommend, renegotiate, condition or decline execution	Set conditions for KYC, lawful funds, lender approval, regulatory feasibility, tax filings, transaction documents, and a reconciled base, downside and evidenced-upside model.
Review year-one results and compliance	Compare actual rent, vacancy, repairs, DSCR, loan balance, taxes, ATED return position, distributions, fees, and FX against the approved model and covenant conditions.
Proportionate, evidenced and financially reconciled route	The chosen route is supported by lawful funds, purchaser-specific tax analysis, lender approval, full-cost return metrics, complete filings, and evidence appropriate to its complexity. This may be a simple route rather than a fund.
Timely stop or renegotiation protects the client	The adviser pauses, renegotiates, or declines because evidence, funding, financing, economics, timing, or legal feasibility is unresolved. The decision preserves compliance and avoids unsupported execution.
Lawful but uneconomic or materially defective execution	The route suffers a financing or DSCR mismatch, unsupported treaty position, purchaser-tax error, compliance failure, excessive fund costs, trapped distributions, or operational underperformance. Concealed ownership or unlawful funding is a failure condition.

Tax position

Item	Professional record
Three-country legal and tax gates require verification	Purchaser-specific UK tax and filings, PRC worldwide tax and lawful outbound funding, and Liechtenstein AIF eligibility, regulation, substance, transparency, treaty, and distribution treatment must be documented. Formation alone creates no treaty access.
Set the scope of the engagement	Choose whether to test the requested fund against lawful alternatives or initially limit work to the requested structure, subject to professional independence.
Define the 10% return metric	Require a named metric and present gross yield, NOI yield, after-tax cash-on-cash return, and 10-year after-tax equity IRR separately.
Obtain residence, UBO, wealth and funds evidence	Decide whether the file supports lawful ownership and funding or whether advice must pause pending satisfactory evidence.
Commission asset, rent, title and lender diligence	Test title, five-dwelling status, licensing and landlord obligations, achievable rent, operating costs, amortization, security, and borrower conditions.
Decide whether to reserve the property	Choose whether to reserve conditionally, renegotiate timing or economics, or avoid commitment while material evidence remains outstanding.
Obtain coordinated UK, PRC and Liechtenstein opinions	Commission current, source-supported advice addressing tax, filings, outbound funds, AIF availability, transparency, treaty access, substance, leverage, and distributions.
Accept or reject the proposed funding route	Proceed only with documented wealth and a lawful bank or SAFE-compliant route; unresolved or misdescribed funds require a pause or refusal.
Compare ownership and financing routes	Compare direct individual ownership, a UK property SPV, an available Liechtenstein AIF, and an AIF holding a UK SPV, together with stopping or renegotiating.
Test the Liechtenstein AIF evidence package	Require an FMA-authorised AIFM letter covering eligibility, approval, providers, leverage, legal form, substance, AML, UBO, CRS, tax transparency, treaty and PPT analysis, lender security, PRC distributions, timing, and complete fees.
Complete purchaser-specific tax and cash-flow modeling	Calculate SDLT only after purchaser, title, residence, and relief facts are known. Reconcile NOI, amortizing debt, DSCR, country taxes, distributions, full initial equity, returns, break-even points, exit, FX, and fund payback.
Recommend, renegotiate, condition or decline execution	Set conditions for KYC, lawful funds, lender approval, regulatory feasibility, tax filings, transaction documents, and a reconciled base, downside and evidenced-upside model.
Review year-one results and compliance	Compare actual rent, vacancy, repairs, DSCR, loan balance, taxes, ATED return position, distributions, fees, and FX against the approved model and covenant conditions.
Proportionate, evidenced and financially reconciled route	The chosen route is supported by lawful funds, purchaser-specific tax analysis, lender approval, full-cost return metrics, complete filings, and evidence appropriate to its complexity. This may be a simple route rather than a fund.

Tax position

Item	Professional record
Timely stop or renegotiation protects the client	The adviser pauses, renegotiates, or declines because evidence, funding, financing, economics, timing, or legal feasibility is unresolved. The decision preserves compliance and avoids unsupported execution.
Lawful but uneconomic or materially defective execution	The route suffers a financing or DSCR mismatch, unsupported treaty position, purchaser-tax error, compliance failure, excessive fund costs, trapped distributions, or operational underperformance. Concealed ownership or unlawful funding is a failure condition.

4. Economics and scenario analysis

Investment and cash-flow analysis

Input	Value
Purchase price	£1,000,000
LTV	80.0%
Interest rate	7.5%
Term	120 months
Gross annual income	£146,000
Known operating costs	£36,500
One-off structure cost	£15,000
Annual structure cost	£10,000
Target cash-on-cash return	10.0%

Repayment basis	Debt service	Annual cash flow	CoC	DSCR
Amortizing	£113,954	-£14,454	-5.1%	0.87x

These are deterministic calculations from supplied assumptions, not probabilities or a forecast. Currency effects, exit costs, tax and unpriced costs are excluded. Use the Decision report for explicit income sensitivities.

- Initial deposit is £200,000.
- The acquisition-cost input is 7% of the £1,000,000 price and is provisional rather than a calculated SDLT amount.
- Owner-revised annual gross rent: £146,000. Expenses: $25\% \times £146,000 = £36,500/\text{year}$. Rent after these expenses: £109,500/year before financing and other costs. After £10,000 structure cost and £113,953.70 amortizing debt service, cash flow is -£14,453.70/year before tax and unknown costs. Independent evidence and outcome approval are pending.
- Known initial cash is at least £285,000 before currently unpriced professional, lender, valuation, registration, and reserve costs.
- Scheduled amortizing debt service uses the supplied control of £9,496.14 monthly and £113,953.70 annually, subject to confirmation.
- The lender's minimum DSCR is 1.25x, calculated as NOI divided by scheduled debt service.

- Interest-only debt service of £60,000 annually plus an £800,000 balloon remains a comparison control, not the selected repayment basis.

Boundary end

The following figures are an arithmetic scenario only. Rate sources, taxable base, deductibility and eligibility are not established by this model. Do not treat the amounts as verified savings or offset them against a financing shortfall.

Unverified tax scenario – not a tax recommendation

Metric	Result
Annual taxable base	£49,500
Baseline / optimized tax rates	35.0% / 5.0%
Derived baseline / optimized tax	£17,325 / £2,475
Supplied benefit adjustment	85.0%
Analysis horizon	36 months
Annual discount rate	8.0%
One-off implementation	£15,000
Annual maintenance	£10,000
Terminal tax / unwind cost	£25,000
Gross annual tax saving	£14,850
Recognized annual saving	£12,623
Annualized implementation	£5,000
Annualized net benefit	-£2,378
Simple payback	68.6 months
Lifecycle ROI	-45.9%
NPV	-£27,843

The supplied benefit adjustment scales only positive modeled savings; it is not an evidenced probability. It does not reduce a modeled downside.

Simple payback of 68.6 months exceeds the 36-month analysis horizon.

Assumptions: Tax base is prefilled as gross annual rent less rental-property expenses less annual loan-interest expense. Verify every case input and tax rate before relying on the estimate.

Tax-rate sources: baseline=unset; optimized=unset.

5. Scenario and decision map

Type	Issue / step	Leads to
Trigger	Client requests a five-flat cross-border structure	PRC-resident, non-UK-resident client
Actor	PRC-resident, non-UK-resident client	Five-flat acquisition and amortizing debt profile; UK real estate object
