Гриф: DRAFT

Уведомление для профессионального использования

Отчёт сформирован из схемы Studio. Это структурированный рабочий материал, а не замена юридической, налоговой, финансовой или регуляторной консультации по соответствующей юрисдикции. До использования или распространения проверьте факты, источники, допущения и расчёты.

Сведения о проверке в Studio не подтверждают независимое утверждение в рабочем процессе. Записанные запуски и независимо подтверждённые результаты доступны в деле.

Сформирован: 29 сентября 2026 г. в 02:00 UTC

1. Резюме для принятия решения

ЧЕРНОВИК - предварительный анализ

Вопрос проверки	Краткое содержание модели
Цель	The client seeks advice on acquiring five English flats and prefers a Liechtenstein fund while demanding an undefined 10% annual return.
Исходные данные	Five-flat acquisition and amortizing debt profile: Price is £1,000,000 with £800,000 debt, £200,000 deposit, 7.5% rate, 120-month amortization, £146,000 corrected annual gross rent (owner-provided [фрагмент]) Annual rental income: Annual gross rental income: £146,000 per year. Source status: Owner-revised assumption. Expenses under the 25% rule: $25\% \times £146,000 = £36,500$ per [фрагмент] Ещё 1 в деле.
Критерии решения	Set the scope of the engagement Define the 10% return metric Obtain residence, UBO, wealth and funds evidence Commission asset, rent, title and lender diligence Decide whether to reserve the property Obtain coordinated UK, PRC and Liechtenstein opinions Accept or reject the proposed funding route Compare ownership and financing routes Test the Liechtenstein AIF evidence package Ещё 3 в деле.
Возможные решения	Proportionate, evidenced and financially reconciled route Timely stop or renegotiation protects the client Lawful but uneconomic or materially defective execution
Вывод и обоснование	PDF описывает модель кейса. Он не устанавливает выбранное решение и не подтверждает завершённый запуск. Перед рекомендацией проверьте полные условия соответствующей ветви в деле.
Допущения	Initial deposit is £200,000. The acquisition-cost input is 7% of the £1,000,000 price and is provisional rather than a calculated SDLT amount. Остальные допущения - в экономическом приложении.
Источники и ограничения	Публичных HTTPS-источников: 1; записей доказательств: 1. Статус проверки отдельных фактов в модели Studio не записан. Ссылки внутри записей тоже требуют проверки.
Следующие действия	Сверьте данные и допущения с источниками; выполните нужные сценарии; зафиксируйте выбранное решение и его условия; получите независимое утверждение в рабочем процессе дела.

Выше приведены выбранные записи и обозначенные фрагменты. Полное текстовое приложение к графу исключено. Полные условия узлов и связей проверяйте в деле. Текст самого кейса сохраняет исходный язык.

3. Профильный анализ

Факты и доказательства

Элемент	Профессиональная запись
Five-flat acquisition and amortizing debt profile	Price is £1,000,000 with £800,000 debt, £200,000 deposit, 7.5% rate, 120-month amortization, £146,000 corrected annual gross rent (owner-provided input; independent evidence pending), and a 1.25x lender DSCR threshold. The broker's separate £150,000 claim is unsupported. Owner-revised expenses under the 25% rule: $25\% \times £146,000 = £36,500$ per year. Rent after these expenses, before financing and other costs: $£146,000 - £36,500 = £109,500$ per year.
Client KYC profile	Client should provide a completed KYC questionnaire

Источники права

Элемент	Профессиональная запись
Three-country legal and tax gates require verification	Purchaser-specific UK tax and filings, PRC worldwide tax and lawful outbound funding, and Liechtenstein AIF eligibility, regulation, substance, transparency, treaty, and distribution treatment must be documented. Formation alone creates no treaty access.

Варианты

Элемент	Профессиональная запись
Set the scope of the engagement	Choose whether to test the requested fund against lawful alternatives or initially limit work to the requested structure, subject to professional independence.
Define the 10% return metric	Require a named metric and present gross yield, NOI yield, after-tax cash-on-cash return, and 10-year after-tax equity IRR separately.
Obtain residence, UBO, wealth and funds evidence	Decide whether the file supports lawful ownership and funding or whether advice must pause pending satisfactory evidence.

Варианты

Элемент	Профессиональная запись
Commission asset, rent, title and lender diligence	Test title, five-dwelling status, licensing and landlord obligations, achievable rent, operating costs, amortization, security, and borrower conditions.
Decide whether to reserve the property	Choose whether to reserve conditionally, renegotiate timing or economics, or avoid commitment while material evidence remains outstanding.
Obtain coordinated UK, PRC and Liechtenstein opinions	Commission current, source-supported advice addressing tax, filings, outbound funds, AIF availability, transparency, treaty access, substance, leverage, and distributions.
Accept or reject the proposed funding route	Proceed only with documented wealth and a lawful bank or SAFE-compliant route; unresolved or misdescribed funds require a pause or refusal.
Compare ownership and financing routes	Compare direct individual ownership, a UK property SPV, an available Liechtenstein AIF, and an AIF holding a UK SPV, together with stopping or renegotiating.
Test the Liechtenstein AIF evidence package	Require an FMA-authorised AIFM letter covering eligibility, approval, providers, leverage, legal form, substance, AML, UBO, CRS, tax transparency, treaty and PPT analysis, lender security, PRC distributions, timing, and complete fees.
Complete purchaser-specific tax and cash-flow modeling	Calculate SDLT only after purchaser, title, residence, and relief facts are known. Reconcile NOI, amortizing debt, DSCR, country taxes, distributions, full initial equity, returns, break-even points, exit, FX, and fund payback.
Recommend, renegotiate, condition or decline execution	Set conditions for KYC, lawful funds, lender approval, regulatory feasibility, tax filings, transaction documents, and a reconciled base, downside and evidenced-upside model.
Review year-one results and compliance	Compare actual rent, vacancy, repairs, DSCR, loan balance, taxes, ATED return position, distributions, fees, and FX against the approved model and covenant conditions.
Proportionate, evidenced and financially reconciled route	The chosen route is supported by lawful funds, purchaser-specific tax analysis, lender approval, full-cost return metrics, complete filings, and evidence appropriate to its complexity. This may be a simple route rather than a fund.
Timely stop or renegotiation protects the client	The adviser pauses, renegotiates, or declines because evidence, funding, financing, economics, timing, or legal feasibility is unresolved. The decision preserves compliance and avoids unsupported execution.
Lawful but uneconomic or materially defective execution	The route suffers a financing or DSCR mismatch, unsupported treaty position, purchaser-tax error, compliance failure, excessive fund costs, trapped distributions, or operational underperformance. Concealed ownership or unlawful funding is a failure condition.

Concealed ownership or unlawful funding is a failure condition.

4. Экономика и сценарный анализ

Инвестиционный анализ и денежный поток

Параметр	Значение
Цена приобретения	1 000 000 £
LTV	80.0%
Процентная ставка	7.5%
Срок	120 мес.
Валовой годовой доход	146 000 £
Известные операционные расходы	36 500 £
Разовые расходы структуры	15 000 £
Ежегодные расходы структуры	10 000 £
Целевая доходность на капитал	10.0%

Вид погашения	Обслуживание долга	Годовой денежный поток	CoC	DSCR
Амортизируемый	113 954 £	-14 454 £	-5.1%	0.87x

Это детерминированные расчёты по указанным допущениям, не вероятности и не прогноз. Валютные эффекты, расходы выхода, налоги и неоценённые затраты исключены. Явные сценарии дохода доступны в отчёте для принятия решения.

- Initial deposit is £200,000.
- The acquisition-cost input is 7% of the £1,000,000 price and is provisional rather than a calculated SDLT amount.
- Owner-revised annual gross rent: £146,000. Expenses: 25% × £146,000 = £36,500/year. Rent after these expenses: £109,500/year before financing and other costs. After £10,000 structure cost and £113,953.70 amortizing debt service, cash flow is -£14,453.70/year before tax and unknown costs. Independent evidence and outcome approval are pending.
- Known initial cash is at least £285,000 before currently unpriced professional, lender, valuation, registration, and reserve costs.
- Scheduled amortizing debt service uses the supplied control of £9,496.14 monthly and £113,953.70 annually, subject to confirmation.
- The lender's minimum DSCR is 1.25x, calculated as NOI divided by scheduled debt service.

- Interest-only debt service of £60,000 annually plus an £800,000 balloon remains a comparison control, not the selected repayment basis.

Следующие суммы — только арифметический сценарий. Модель не устанавливает источники ставок, базу, вычеты и применимость. Не считайте суммы подтверждённой экономией и не компенсируйте ими дефицит финансирования.

Непроверенный налоговый сценарий — не налоговая рекомендация

Показатель	Результат
Годовая налоговая база	49 500 £
Базовая / оптимизированная ставки	35.0% / 5.0%
Расчётный базовый / оптимизированный налог	17 325 £ / 2 475 £
Заданная корректировка выгоды	85.0%
Горизонт анализа	36 мес.
Годовая ставка дисконтирования	8.0%
Разовые затраты на внедрение	15 000 £
Годовые затраты на сопровождение	10 000 £
Налог / затраты при завершении	25 000 £
Валовая годовая налоговая экономия	14 850 £
Признанная годовая экономия	12 623 £
Внедрение в пересчёте на год	5 000 £
Чистый годовой эффект	-2 378 £
Простая окупаемость	68.6 мес.
ROI жизненного цикла	-45.9%
NPV	-27 843 £

Заданная корректировка применяется только к положительной расчётной экономии; это не подтверждённая вероятность. Она не уменьшает расчётный отрицательный результат.

Простая окупаемость 68.6 мес. превышает горизонт анализа 36 мес.

Допущения: Tax base is prefilled as gross annual rent less rental-property expenses less annual loan-interest expense. Verify every case input and tax rate before relying on the estimate.
Tax-rate sources: baseline=unset; optimized=unset.
